## **PATIENT INFORMATION SHEET - SPIROMETRY**

The spirometry test should not be carried out if you have had any of the following:

- Recent eye surgery within 3 months
- Recent thoracic and abdominal surgery within 3 months
- Unresolved pneumothorax
- Aneurysms
- Unstable chest condition, cough or chest infection
- Unstable cardiac function
- Coughing-up blood of unknown cause
- Nausea, diarrhoea and vomiting
- Current chest and abdominal pain
- If you are on antibiotics

Please contact our clinic to reschedule your appointment if you have any of the above conditions.
